Project Iberia

Iberian Fuel Retail Market Overview

Market structure, demand drivers, margins, offering trends and consolidation in Spain & Portugal

Discussion materials for prospective investors | November 2026

RBC Capital Markets

DRAFT - Strictly private & confidential. Supported by Excel back-up with cell-level source references.

Executive Summary

A large, fragmenting and highly cash-generative market where unit margins are offsetting a gradual volume decline

1	**Market players & share**	Repsol leads (26% of Spanish sites; c.33% of Iberian road-fuel volume); independents now 44% of sites and 45% of volume
2	**Owner types**	Listed integrated majors (Repsol, Galp, BP) vs sovereign/PE (Moeve) and PE- or founder-owned low-cost chains (Plenergy, Petroprix)
3	**Sites & site size**	12,746 Spanish sites (2025A), record high; c.2.3m litres per site vs 2.7m European average - Spain is over-networked
4	**Car parc & driving**	Parc growing c.1% p.a. but km per vehicle down from 10.6k to 9.9k (2019A-23A); EVs only 2.4% of the vehicle parc (2025A)
5	**Off-street parking**	65% of Spaniards live in flats (EU-27: 48%) - limited home charging slows EV adoption vs northern Europe
6	**Taxes & intervention**	Taxes 49% of petrol price (2025A); temporary 2026 cuts, CNMC monthly margin monitoring and a €20.5m Repsol fine
7	**Fuel volumes**	35.4bn litres in Spain (2025A, above 2019); forecast (1.4%) p.a. to 2030E
8	**Fuel margins**	Gross margin up from 19.7 to 29.1c€/l (petrol, 2019A-25A); margin pool c.€8.4bn growing despite volume
9	**Offering trends**	Price dominates choice (72% of drivers) yet majors grow non-fuel: Repsol non-oil margin €156m→€188m, target >€220m (2028)
10	**SOTP & M&A**	Retail segments worth c.€2-11bn on illustrative multiples; Galp-Moeve RetailCo (c.3,500 sites) abandoned Oct-26 - consolidation remains open

Notes: *2030E figures are estimates based on assumptions set out in the Excel back-up ('Assumptions' tab). SOTP range uses illustrative 6-8x EV/EBITDA - not broker figures.*

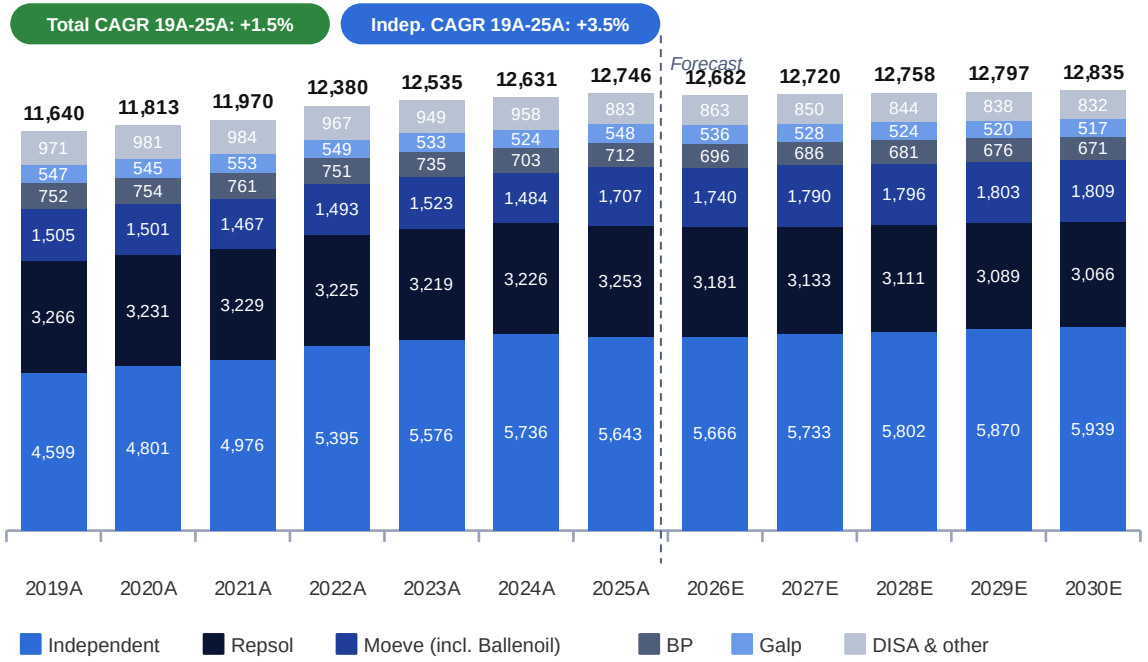

Draft - strictly private & confidential

Evolving Iberian Forecourt Operator Landscape

Independents have taken share for a decade; Moeve's Ballenoil deal shows the majors now buying, not just losing, the low-cost model

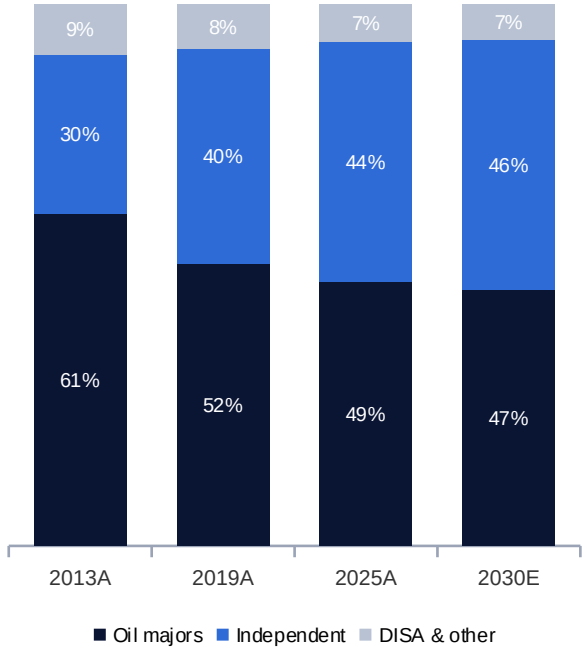

Independents Have Steadily Gained Share in Spain

(# of service stations, year-end)

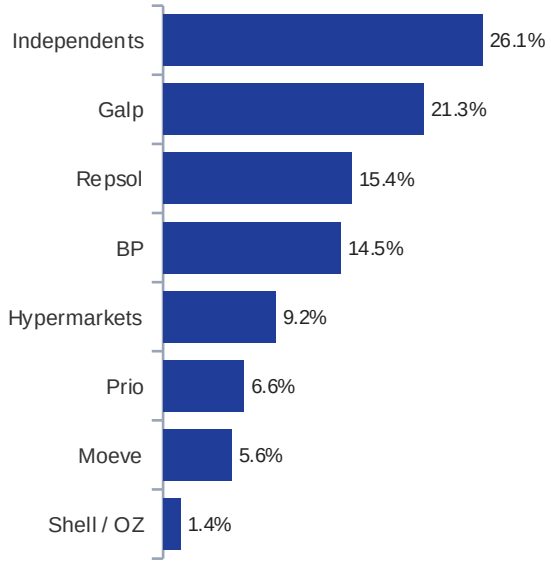

...Driving a Shift in Mix

(% of service stations by type)

Portugal: Galp-Led, Fragmented

(% of 3,457 sites by brand, H1-2026)

Galp's share of branded sites fell from 26.4% (2023) to 24.9% (2025) - Marktest

Commentary

- Spanish network reached a record 12,746 sites in 2025A (+1,106 vs 2019A), driven by independents; the first-ever decline came in H1-26 (12,562) as the census was cleaned up
- Law 11/2013 capped DODO exclusivity and froze network growth for operators >30% provincial share - independents rose from 29.5% (2013A) to 45.4% (2024A); Repsol's share fell from 34.2% to 25.5%
- Moeve's Ballenoil acquisition re-classified 367 sites, lifting the three refiners to 44.5%; by volume, refiners (45.3%) and independents (45.1%) are now at parity (2025A)
- We forecast independents at 46.3% of sites by 2030E on a broadly flat network (+0.3% p.a.)

Volume share 2025A

Refiners 45.3% | Independents 45.1% | Other 9.6%

Average site sells c.2.6m litres; refiner sites out-sell independents per site despite fewer outlets

Sources: *CNMC (Informe anual 2020 p.52; Boletín dic-25 pp.4, 58-60; blog Sep-26), AICE Memoria 2024/25, OC&C via client sample p.14, ERSE (Aug-26 study, Fig.3-11), Marktest. Excel tab 'S3_Landscape'.*
Notes: *Independent = no exclusive wholesale supply contract. 2026E-30E: network growth -0.5% (26E) / +0.3% p.a.; independent share +0.4pp p.a.; Ballenoil to 500 sites by 2027 (company target). Moeve incl. Ballenoil from 2025A.*

Draft - strictly private & confidential

Market Players & Owner-Type Differentiation

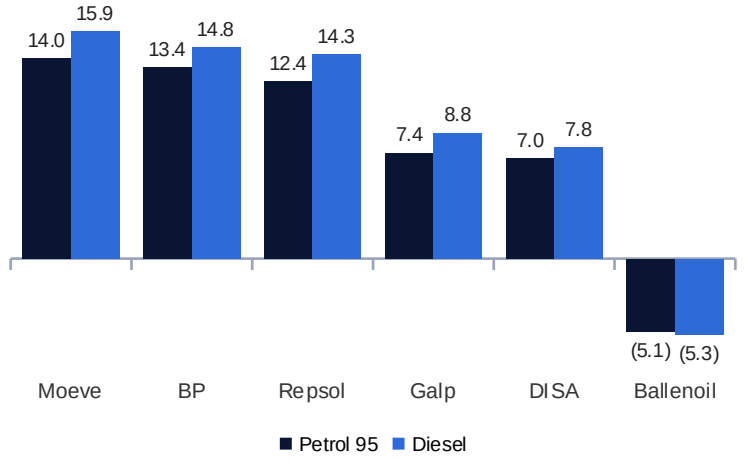

Listed integrated majors defend premium price points with non-fuel; PE- and founder-backed low-cost chains win on price and cost-to-serve

Who Owns Iberian Forecourts - and How They Compete

Group	Owner type	Iberian sites	Positioning	Non-fuel / convenience	Direction
Repsol	Listed	c.3,800 (ES 3,253)	Premium leader; c.33% Iberian road-fuel share	c.780 stores; SuperCor (100% Gespevesa); Klin; Waylet 10.8m users	Non-oil margin >€220m by 2028
Moeve	Sovereign + PE (Mubadala, Carlyle)	1,598 + 380 Ballenoil	Premium network + low-cost 2nd brand	Carrefour Express (c.450 stores)	RetailCo with Galp abandoned Oct-26
BP	Listed	712 ES; c.500 PT	Premium international brand	DIA pilot; joint loyalty 285 sites	Group exiting c.10% of company sites
Galp	Listed (Amorim-anchored)	1,230 (PT 706)	PT leader; ES challenger	C&CS = 35% of Commercial EBITDA	Commercial EBITDA >€350m 2026E
DISA	Private / family	362 ES + Canaries	Mid-tier; Canaries leader	Limited	Most aggressive price cuts 2025
Plenergy	PE (Portobello, Tensile)	350 ES (384 Jun-26)	Low-cost, fully unmanned	Fuel-only	500 sites by 2027; 11-12% share goal
Petroprix	Founder / family	180 ES (187 Jun-26)	Low-cost, unmanned	Fuel-only	300 sites by 2027; not for sale
Hypermarkets	Grocers / co-ops	12.3% of ES sites; 317 PT	Lowest price tier	Grocery adjacency	Stable since 2021

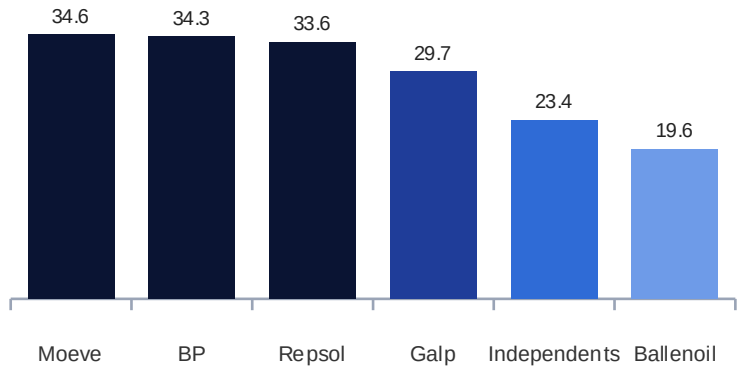

Price Premium vs Independents

(c€/l above independent average, Dec-2025, Peninsula & Balearics)

Gross Margin by Network Type

(c€/l, 2025A average, petrol 95)

Differentiation by owner type

- Listed integrated majors (Repsol, Galp, BP): refinery-backed supply, premium pricing (c.12-14c€/l above independents), loyalty apps and convenience partnerships; capital allocation increasingly favours upstream / low-carbon
- Sovereign / PE-owned Moeve: runs a dual-brand model - premium Moeve network plus unmanned Ballenoil, the cheapest network in Spain (margin c.19-20c€/l vs c.34c€/l on its main network)
- PE-owned Plenergy and founder-owned Petroprix: fully/largely unmanned, fuel-only, spot-supplied; growth targets of 500 and 300 sites by 2027 respectively
- Grocers and co-ops (Carrefour, Alcampo, BonÀrea; Intermarché, Auchan in PT) use fuel as a traffic driver and set the price floor

Sources: *CNMC Boletín dic-25 (PVP p.40, PAI-Ci p.51); AICE Memoria 2025; Repsol CMD (Mar-26); Galp FY25; Business People (Oct-26); El Español (Sep-25); ERSE (Aug-26); press. Excel tabs 'S4_Players', 'S10_Margins'.*
Notes: *Gross margin = pre-tax pump price less international product quotation (CNMC PAI-Ci); covers logistics, biofuel obligations, stockholding and dealer/operator returns.*

Site Numbers & Average Site Size vs Other Geographies

Spain has Europe's second-largest network but below-average throughput per site - a structural driver of consolidation

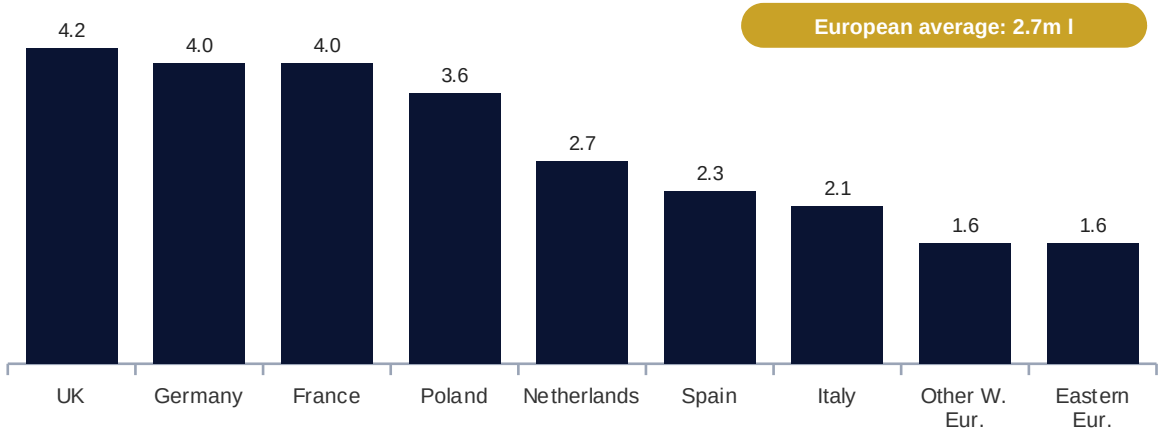

Oil Company Ownership Varies Across European Networks

(# of service stations, thousands, 2025A; owner-type mix 2024A - latest available)

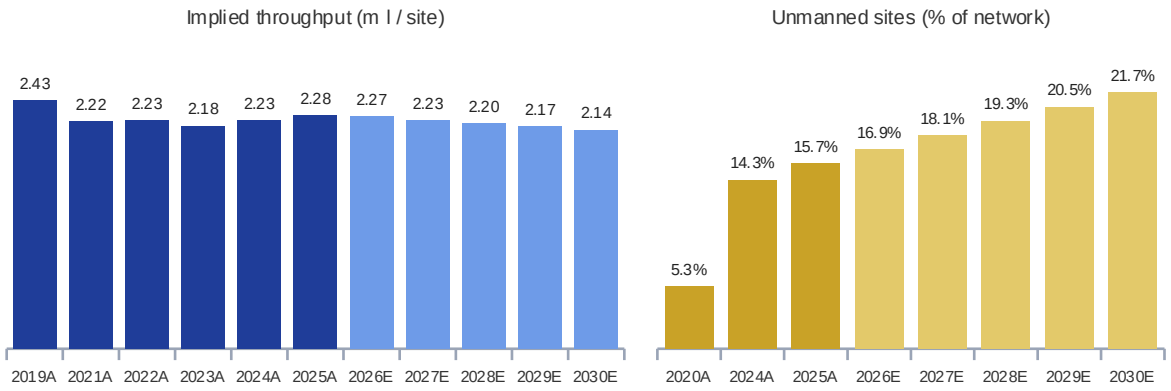

...and Throughput per Site

(fuel volume per service station, million litres p.a., 2024A)

Spain: Throughput per Site Set to Erode Further

(implied m litres per site; unmanned sites as % of network)

Commentary

- Spain operates 12,746 sites - c.26 per 100,000 inhabitants - second only to Italy (21,700) among large European markets; Portugal adds 3,260 (FuelsEurope 2025A)
- Average throughput of c.2.3m litres per site (OC&C) is c.15% below the 2.7m European average and less than 60% of UK / German levels; CNMC's reporting-site average is 2.59m l (2025A)
- Our implied throughput falls from 2.28m l (2025A) to 2.14m l (2030E) as volume declines on a flat network
- Formats are shifting to lower-cost models: unmanned sites rose from 5.3% (2020A) to 15.7% (2025A) of the network, 67% of them independents; hypermarket/co-op sites 12.3% (vs 11.4% in 2010)
- Low throughput, independent fragmentation and rising compliance costs favour scaled operators and roll-up strategies

Sources: *FuelsEurope Statistical Report 2026 p.73 (2025 station counts); OC&C Analysis via client sample slide p.15 (ownership mix, throughput - latest available 2024); CNMC (Informe 2020 p.44; Boletín dic-25 pp.4, 61-63; blog Aug-25); Libertad Digital (citing CNMC). Excel tab 'S5_Sites_Europe'.*
Notes: *Implied throughput = Spanish road fuel (CORES) x forecourt channel share (96% petrol / 77% diesel) / total sites. Unmanned 2026E-30E +1.2pp p.a. (assumption).*

Draft - strictly private & confidential

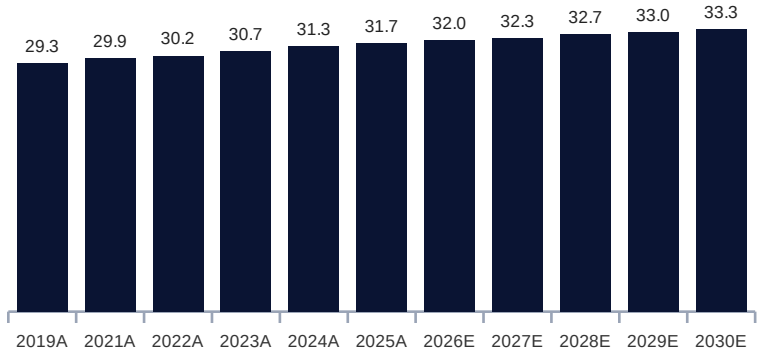

Steady Iberian Fuel Demand Dynamics

Car parc growth offset by declining distance per vehicle; the fleet is old and still overwhelmingly diesel and petrol

Total Vehicle Parc - Spain

(million vehicles)

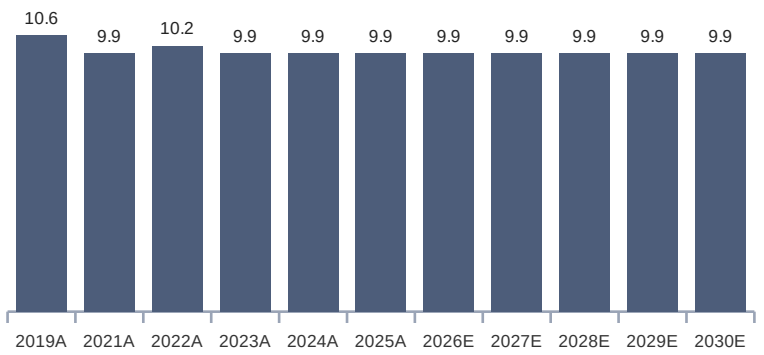

CAGR 19A-23A: +1.2%

Average Distance per Vehicle

(km in 000s; 2024+ held flat)

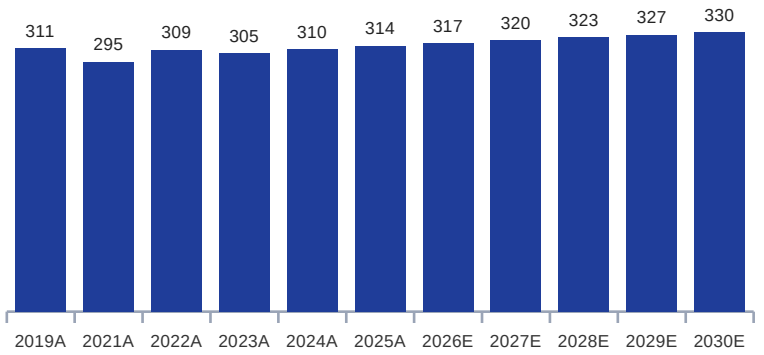

CAGR 19A-23A: (1.7%)

Total Distance Travelled

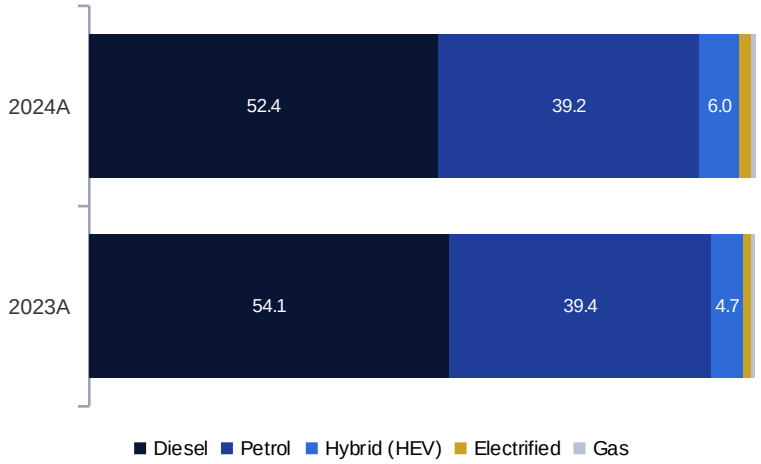

(km in billions)

CAGR 19A-23A: (0.5%)

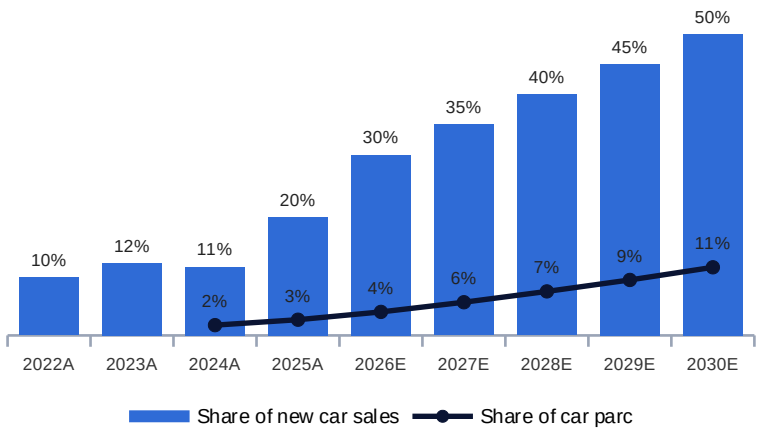

Passenger-Car Parc by Drivetrain

(% of 26.5m cars, Spain)

Electrification of New Sales vs the Fleet

(% electrified (BEV+PHEV): new car sales vs car parc)

Demand drivers

- Total vehicle parc 31.7m (2025A, +1.3% y/y); average car age 14.6 years - one of Europe's oldest fleets
- Distance per vehicle down from 10.6k to 9.9k km (2019A-23A): remote working, modal shift and urban speed limits
- Diesel still 52% of cars, but only c.5-6% of 2025 sales - the fuel mix is shifting to petrol / HEV
- Electrified cars reached 20% of 2025A sales (1.15m cars) - but on our assumptions still only c.11% of the parc by 2030E
- Portugal: 7.6m vehicles (2024A), 62% diesel

Sources: *ANFAC (Informe parque 2024 and 2025 (Feb-26); Informe Anual 2025; Vehículo electrificado 2024 pp.4-6, 25; 2025 close incl. FACONAUTO/GANVAM forecasts), Odyssee-Mure and ANFAC via client sample p.16, PORDATA. Excel tab 'S6_CarParc'.*

Notes: *2026E-30E parc +1.0% p.a.; km/vehicle held at 9.9k (latest published: 2023A); registrations 1.25m (26E, FACONAUTO) flat thereafter; electrified sales share 30% (26E, GANVAM) +5pp p.a.; no EV scrappage.*

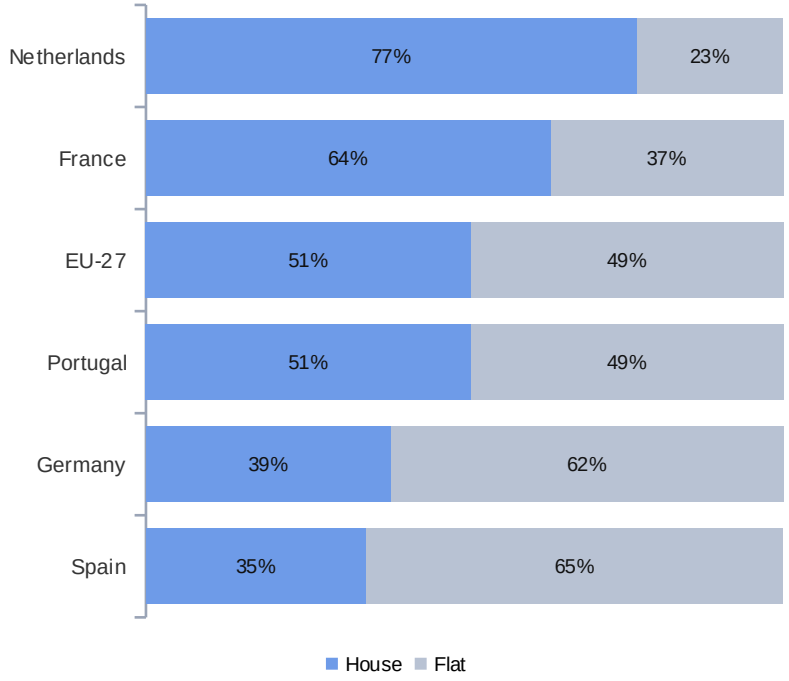

Draft - strictly private & confidential

Slow EV Transition & Limited Off-Street Parking

Apartment living constrains home charging - Spain trails Europe on EV adoption and public charging density

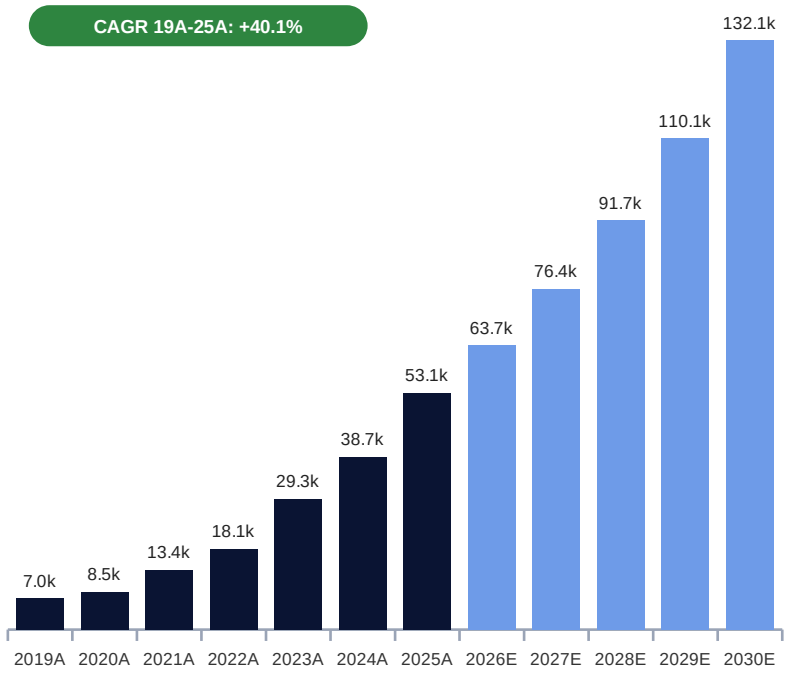

Off-Street Parking Proxy: Houses vs Flats

(% of population by dwelling type, 2024A)

Spain Public Charging Points

(# public-access points in service, year-end)

Spain vs Europe on EV Adoption

(2024A unless stated)

	Spain	EU-27
Electrified share of new car sales	11.4%	20.7%
BEV share of new car sales	5.6%	13.6%
Public charge points per million people	805	1,877
Electrified share of car parc (2023A)	1.4%	3.9%

1 Housing stock

65% of Spaniards live in flats (EU-27: 48%; Netherlands c.23%) - most lack a private, chargeable parking space

2 Charging network

53,072 public points (2025A, +37%) plus 16,340 installed but out of service; 805 per million people vs 1,877 EU average (2024A)

3 Adoption lag

Electrified sales jumped to 19.6% in 2025A (MOVES / Auto+ incentives) but only 2.4% of the vehicle parc is electrified (2025A)

4 Forecourt read-across

Slow fleet turnover protects liquid-fuel demand into the 2030s; fast-charging hubs become a forecourt opportunity

Sources: *Eurostat (Housing in Europe 2025; ilc_lvho01 via Visual Capitalist/DataPulse), ANFAC Vehículo electrificado 2024 (pp.26, 28, 37-38), ANFAC Barómetro Q4-2025, ANFAC parc 2025 and 2025 close. Excel tab 'S7_EV_Parking'.*

Notes: *No harmonised EU data on private off-street parking exists; share of population living in flats is used as the proxy. Charging points 2026E-30E grow +20% p.a. (assumption). Flat share = 1 - house share.*

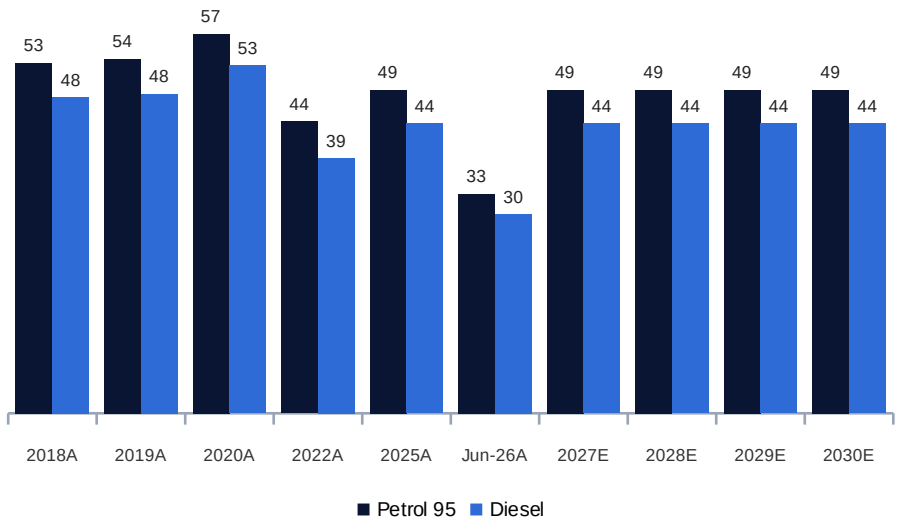

Draft - strictly private & confidential

Government Taxes & Intervention in Fuel Retailing

Taxes are c.45-50% of the pump price; 2026's crisis measures show governments act on taxes and transparency rather than capping margins

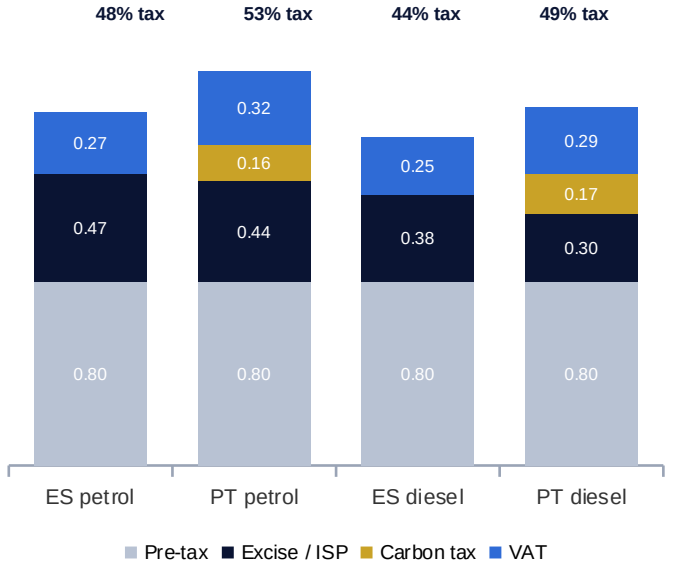

Spain: Taxes as % of Pump Price

(% of PVP, Peninsula & Balearics; 2027E+ assumes RDL measures lapse)

Per-Litre Tax Stack: Spain vs Portugal

(€/l at an illustrative €0.80/l pre-tax price, 2026 rates)

Intervention Timeline

- **2013** — **ES:** Law 11/2013 liberalises supply contracts and caps dominant networks
- **2022** — **ES:** €0.20/l general fuel rebate (Apr-Dec)
- **2022-26** — **PT:** ISP cut equivalent to VAT 23%→13%; carbon-tax freeze
- **Feb-26** — **ES:** CNMC fines Repsol €20.5m (margin squeeze on independents)
- **Mar-26** — **ES:** RDL 7/2026: excise + VAT cut to 10%; monthly margin monitoring
- **Aug-26** — **ES:** RDL 18/2026 restores 5c/l of excise
- **Aug-26** — **PT:** ERSE: no grounds for margin caps; wholesale HHI >2,000

Commentary

- Spain's fuel tax share (48.9% petrol / 43.8% diesel, 2025A) is below Portugal (55.1% petrol, 51% diesel) and the EU average (53.8% / 49.6%) - Portuguese pump prices are structurally higher
- Share swings with oil prices because excise is fixed per litre: 57% in 2020 (low prices) vs 44% in 2022 (price spike)
- 2026 Middle East crisis: Spain cut excise and VAT (RDL 7/2026) to c.30-33% tax share and made CNMC monitor margins monthly; Portugal used ISP rebates and ERSE rejected margin caps
- Regulatory focus is on wholesale behaviour towards independents (Repsol fine) and price transparency (1,424 sites failed price-reporting in Jun-26)

"...the results do not identify grounds for setting maximum margins in fuel retailing"
- ERSE, Aug-2026 (translated from Portuguese)

Sources: *CNMC (Informe 2020 pp.12-14; Boletín dic-25 pp.3, 24; blogs Sep/Oct-26; press Jul-22, Apr-26), Interempresas (CNMC 2022), ERSE (Aug-26; EU bulletins via RTP/DNoticias), Caetano (PT rates). Excel tab 'S8_Taxes'.*
Notes: *Spanish excise €0.4727/l petrol, €0.379/l diesel + 21% VAT; Portugal ISP €0.437/€0.298 + carbon tax €0.159/€0.173 + 23% VAT (May-26). Jun-26A reflects temporary cuts.*

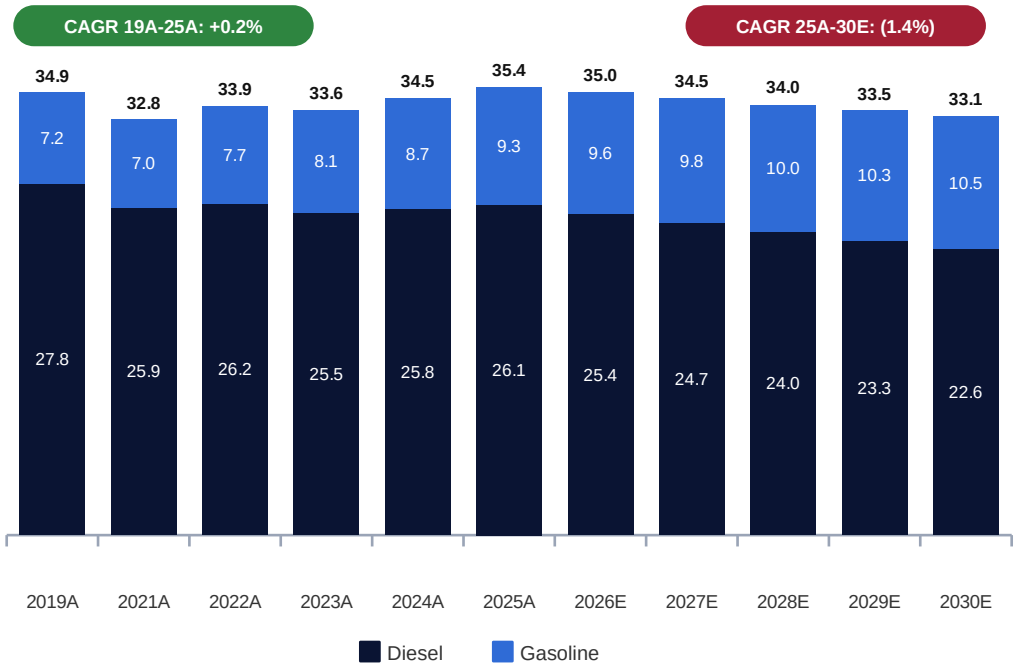

Draft - strictly private & confidential

Fuel Volumes & Trends

Spanish demand is back above 2019 levels; we expect a gradual c.1.5% p.a. decline to 2030E as efficiency and electrification build

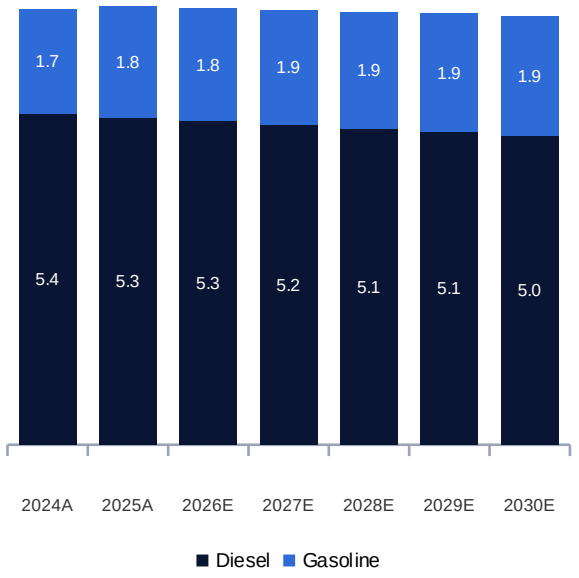

Spain Road-Fuel Consumption

(billion litres; gasolines and automotive diesel)

Portugal Road Fuel

(billion litres)

Spain Leads European Volume Recovery

(retail fuel volume CAGR, OC&C)

	'14-'19	'20-'22	'22-'24	2024 bn l
Spain	+2.2%	+8.0%	+1.8%	29
Italy	(1.7%)	+10.6%	+2.2%	23
Germany	+0.4%	+1.0%	+2.0%	52
UK	+0.5%	+6.3%	+1.4%	36
France	+0.0%	+8.0%	(1.2%)	41
Netherlands	+7.4%	+0.0%	+0.0%	6

Six-market total 187bn l (2024A) vs 196bn l (2019A) - c.95% recovered

Commentary

- Spanish consumption reached 35.4bn litres in 2025A (29,084kt), +1.2% above 2019 per CNMC - the first annual figure above pre-pandemic levels; c.29.1bn litres flows through forecourts (96% of petrol, 77% of diesel)
- Mix is shifting: gasoline rose from 19% to 24% of volume (2019A-25A) as diesel loses share in new-car sales - supportive of retail margins (petrol is c.96% forecourt-sold)
- Forecast applies Repsol's central view of Spanish transport-fuel demand (960 to 890 kboed, 2025-30) - 33.1bn litres by 2030E; H1-26 demand was c.4% below prior year on crisis-driven prices
- Portugal is flat at c.7.1bn litres (2025A +0.6%; LTM Jul-26 +1.7%); we assume -0.5% p.a. given faster EV adoption

Sources: *CORES (consumption reports 2022-25), CNMC Boletín dic-25 p.7 (densities, channel shares), Repsol CMD Mar-26 p.24, EPCOL Inf.198 (DGEG), SAPO/ZERO (Jul-26), OC&C via client sample p.15. Excel tab 'S9_Volumes'.*
Notes: *Litres converted at 0.752kg/l (petrol) and 0.845kg/l (diesel). 2019A backed out from CORES 2022/2019 growth; 2024A-25A per CORES 2025 report. 2020 omitted (COVID).*

Draft - strictly private & confidential

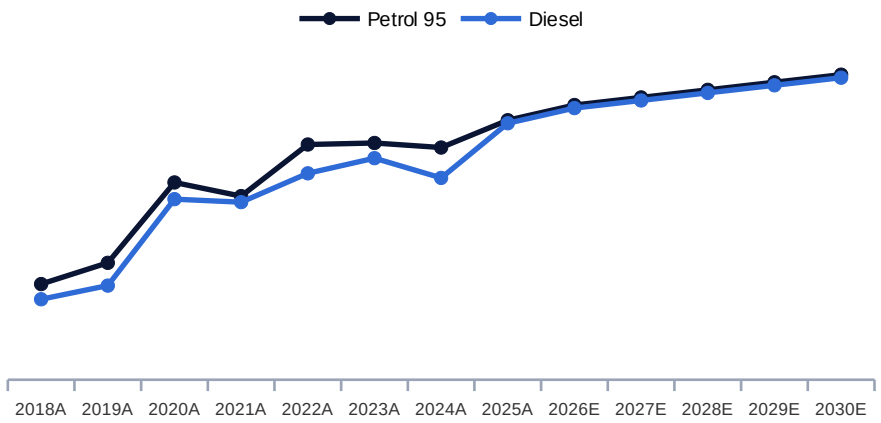

Fuel Margins & Trends

Unit margins have expanded c.50% since 2019 - more than offsetting volume pressure and growing the Spanish profit pool

Spain Gross Distribution Margin

(c€/litre, annual average, PAI - Ci)

Petrol CAGR 19A-25A: +6.7%

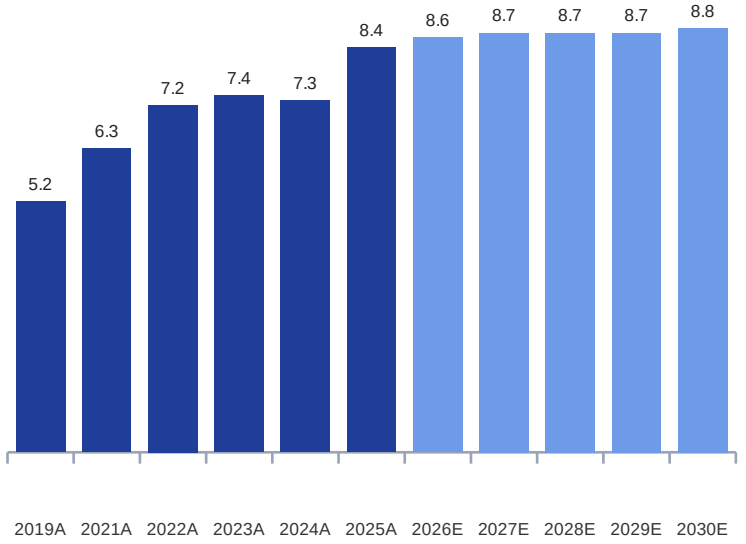

c€/l	'18A	'19A	'20A	'21A	'22A	'23A	'24A	'25A	'26E	'27E	'28E	'29E	'30E
Petrol 95	18.3	19.7	25.0	24.1	27.5	27.6	27.3	29.1	30.1	30.6	31.1	31.6	32.1
Diesel	17.3	18.2	23.9	23.7	25.6	26.6	25.3	28.9	29.9	30.4	30.9	31.4	31.9

Spanish Forecourt Gross-Margin Pool

(€bn; forecourt litres x volume-weighted margin)

Pool CAGR 19A-25A: +8.2%

Resilient Margin Drivers

Price-insensitive demand	Fuel is non-discretionary; margin is c.19-20% of pump price
Mix	Petrol (higher forecourt share) gaining vs diesel
Structure	Refiner networks earn c.34-35c€/l vs c.23c€/l independents
Europe	Spain 24c€/l vs 22c€/l European average (2024A, WoodMac)
Regulation	No margin caps in ES or PT; supervision instead

Commentary

- Spanish gross margins rose from 19.7c€/l (petrol) / 18.2c€/l (diesel) in 2019A to 29.1 / 28.9c€/l in 2025A; margins step up in falling-price periods (2020) and are rebuilt after spikes (2022)
- On CNMC data the forecourt gross-margin pool grew from €5.2bn to €8.4bn (2019A-25A) despite flat volumes; we forecast €8.8bn in 2030E with +0.5c€/l p.a. unit-margin growth offsetting c.1.5% p.a. volume decline
- Jan-Aug 2026 margins are running above the 2025 average in almost every network (CNMC); diesel saw the largest increases amid the Middle East supply shock
- The 11-12c€/l gap between branded and independent networks is the economic engine for both low-cost growth and majors' second brands (Ballenoil c.19c€/l)

Sources: *CNMC (Informe 2020 pp.9, 13-14; Boletín dic-25 pp.3, 51; blog Oct-26), El Diario de Madrid (CNMC 2021-22 margins), Wood Mackenzie / OC&C via client sample p.18. Excel tabs 'S10_Margins', 'S9_Volumes'.*
Notes: *Gross margin (PAI-Ci) covers logistics, biofuel and stockholding obligations plus wholesale and retail returns - not a net margin. Pool = forecourt litres x volume-weighted margin. 2026E = 2025A +1.0c€/l; +0.5c€/l p.a. thereafter (assumptions).*

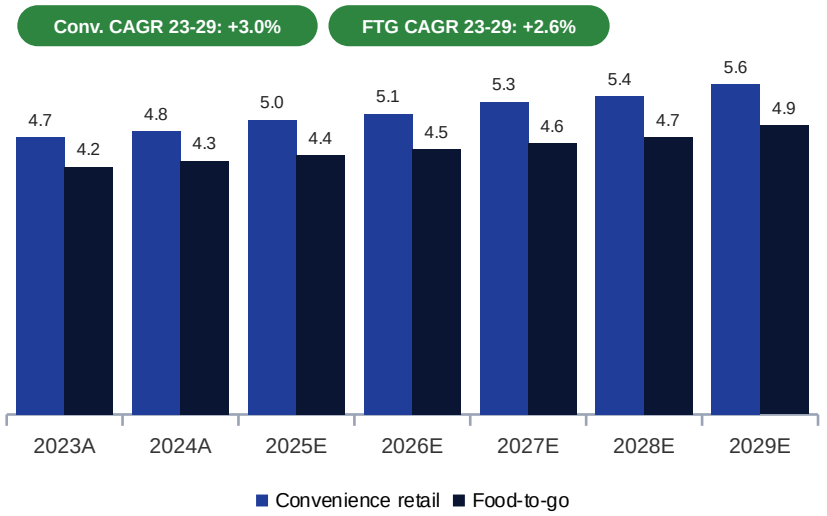

Draft - strictly private & confidential

Offering Trends: Fuel & Non-Fuel

Drivers vote on price, yet majors are building convenience, renewable fuels and EV charging to defend premium sites

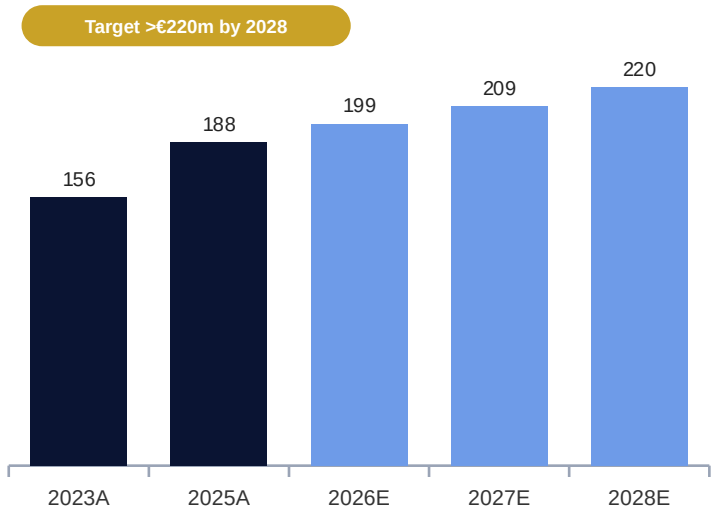

Spain Convenience Retail & Food-to-Go

(€bn; 2025E onwards = 1000IQ / Euromonitor forecast)

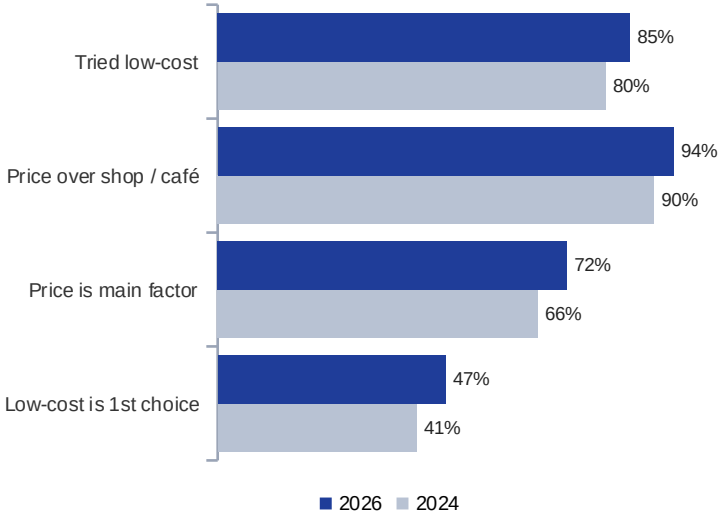

Repsol Iberian Non-Oil Margin

(€m; 2026-27E interpolated to 2028 target)

What Spanish Drivers Want

(% of drivers; IO Investigación surveys for Plenergy)

1,558	Repsol sites with NEXA 100% renewable diesel (2025A)
1,935	Spanish forecourts with EV charging (2025A)
c.780	Repsol forecourt stores - largest Spanish c-store chain
35%	Galp C&CS share of Commercial EBITDA (2025A)
89%	Drivers rarely / never use shop, wash or café (CNMC panel)

- Fuel: majors differentiate on renewable / premium fuels (Repsol NEXA HVO: 248m litres sold in 2025; 1,677 sites by H1-26) and EV fast charging (Ballenoil equipping c.1/3 of sites); low-cost chains compete purely on price and 24/7 unmanned access
- Non-fuel: grocery partnerships are the model - Repsol x El Corte Inglés (SuperCor), Moeve x Carrefour Express (c.450), BP x DIA pilot; Repsol targets >€220m non-oil margin by 2028 (+17% vs 2025A). Survey caveat: price-sensitivity data are commissioned by a low-cost operator

Sources: *1000IQ / Euromonitor via client sample p.19; Repsol CMD Mar-26 pp.31, 34-35, FY25 & H1-26 releases; Galp FY25; AICE Memoria 2025; IO Investigación/Plenergy (2024, 2026); CNMC Panel de Hogares; Hispanidad; Aevecar. Excel tab 'S11_Offering'.*
Notes: *Survey 2024 values for 'first choice' and 'main factor' derived from 2026 results and stated +6pp changes.*

Broker SOTP Framing: Galp & Repsol Retail

Each company reports retail differently - 'Customer' at Repsol, 'Commercial' at Galp - and both segments are growing earnings

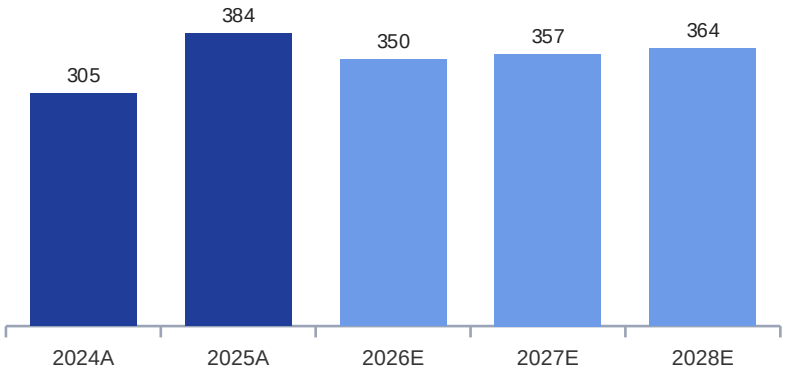

Repsol 'Customer' Segment EBITDA

(€m; 2026E-28E grown in line with guided CFFO)

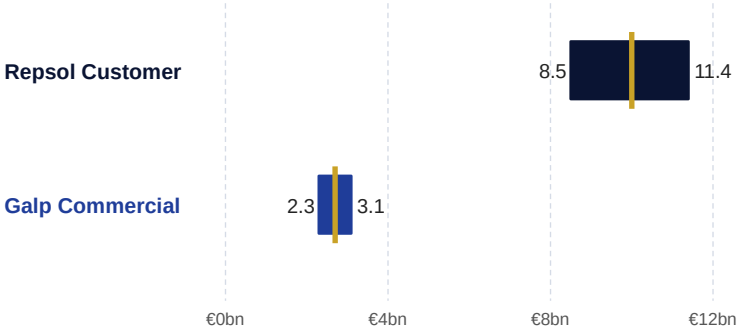

Galp 'Commercial' Segment EBITDA

(€m; 2026E = guidance floor)

Illustrative Retail EV Range

(€bn; 2025A EBITDA x 6.0x / 7.0x / 8.0x placeholder)

Repsol: €8.5-11.4bn (mid €10bn) | €2.6m per site
Galp: €2.3-3.1bn (mid €2.7bn) | €2.2m per site
Benchmark: Plenoil buy-out at €1.2-1.4m per site (2024)

	Repsol	Galp
Reported segment	Customer	Commercial
Scope	Stations, P&G retail, LPG, lubes, aviation	Iberian B2C/B2B oil, gas & power, C&CS, Africa
Iberian sites	c.3,800	c.1,230
2025A EBITDA	€1,423m (+20%)	€384m (+25%)
Guidance	CFFO €1.4-1.6bn (2028)	>€350m EBITDA (2026)
Broker SOTP line	[insert per broker]	[insert per broker]

How to read this page

- Broker SOTPs (brief source 7) sit behind research paywalls and were not accessible; this page sets out the framework and placeholders to drop broker values into
- Neither segment is a pure forecourt business: Repsol 'Customer' includes power & gas retail, LPG and aviation; Galp 'Commercial' includes gas & power and African marketing - brokers typically carve these out
- Repsol Customer EBITDA rose to €1,423m in 2025A, hitting its 2027 target two years early; we grow it at the guided CFFO CAGR (7.7% p.a.)
- Galp Commercial EBITDA rose to €384m (2025A) on Iberian mobility and Spanish B2B; 2026 guidance >€350m, capex c.€100m p.a.
- Market reference points: Galp-Moeve downstream combination valued at >€15bn by press (refining + c.3,500-site RetailCo, abandoned Oct-26); Galp shares fell c.11% on termination
- Next step: replace the 6-8x placeholder with each broker's retail multiple and EBITDA in the Excel 'Assumptions' tab (A24-A26) - all values here update automatically

Sources: *Repsol FY25 results & CMD (Mar-26 pp.2, 31, 35); Galp quarterly releases 2024-25 and FY25 slides; Sensor Automotriz (Plenoil); Xataka/El Mundo; ECO (Oct-26); Business People (Oct-26). Excel tab 'S12_SOTP'.*
Notes: *EV ranges are illustrative only (6.0x-8.0x EV/EBITDA placeholder) and are not broker or RBC valuations. EV per site not like-for-like given non-forecourt segment content.*

Consolidation / M&A Activity Trends in Iberia

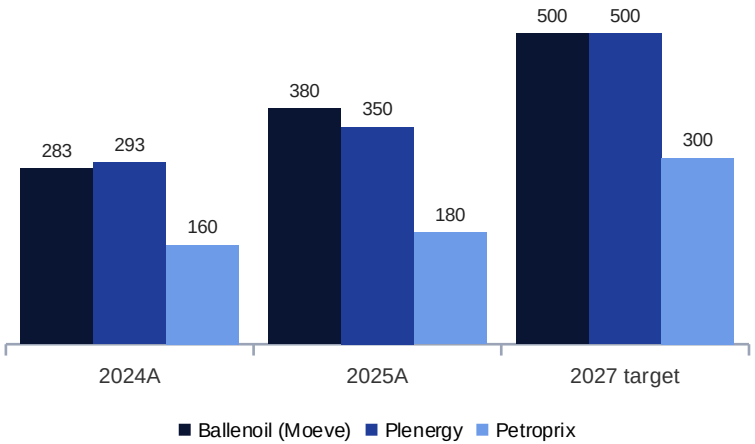

Low-cost platforms are the active consolidators; the failed Galp-Moeve tie-up leaves the top-tier map unchanged - for now

Selected Iberian Fuel Retail Transactions & Alliances

Date	Target / asset	Acquirer / parties	Type	Scale	Status
Oct-26	**Galp & Moeve downstream (RetailCo + IndustrialCo)**	Galp / Mubadala & Carlyle	Retail JV (50/50) + refining merger	c.3,500 sites; >€15bn total	Terminated
Jul-25	**Gespevesa (SuperCor Stop&Go stores)**	Repsol (from El Corte Inglés)	Convenience JV buy-out	40 stores	Completed
Jul-25	**BP x DIA**	BP / DIA (LetterOne)	Convenience & loyalty alliance	10 pilot stores	Pilot
2024	**Ballenoil**	Moeve (ex-Cepsa)	Low-cost chain acquisition	367 sites (2025A)	Completed
Jan-24	**Plenoil (now Plenergy)**	Portobello & Tensile Capital	PE buy-out (c.80%)	c.290 sites; €350-400m	Completed
2025	**Carrefour Express network**	Carrefour / Moeve, Repsol, BP	Exclusivity renegotiated	c.450 stores	Ongoing

Low-Cost Platforms Scaling Fast

(# of sites; 2027 = company targets)

3,887 unbranded independent sites in Spain (c.70% of independents) - the roll-up pool

Consolidation themes

- Integrated majors are reshaping rather than exiting: Moeve bought into low-cost (Ballenoil), Repsol is internalising convenience (Gespevesa), BP is high-grading its group network and partnering with grocers
- Galp-Moeve RetailCo would have created a c.3,500-site #2 (c.22% Iberian share vs Repsol's c.23%) - talks ended 26-Oct-26 after political scrutiny of Sines; both assets remain potential partners or targets
- Private capital is backing the low-cost model: Portobello/Tensile's Plenoil buy-out at €350-400m (c.€1.2-1.4m per site); Petroprix (c.€30m EBITDA) remains family-owned and rejects approaches
- Fragmentation is the opportunity: only 29% of Spain's 5,505 independents belong to a recurring brand; low throughput (c.2.3m l per site) and new compliance costs (CNMC price-reporting enforcement) favour scale

Appendix: Sources, Definitions & Methodology

Every figure in this pack is traceable to a cell-level reference in the accompanying Excel back-up

Primary sources

- Regulators: CNMC (fuel distribution bulletins dic-2025, annual report 2020, blogs 2025-26, press releases); ERSE (Aug-2026 price study; EU bulletins); CORES (consumption 2022-24)
- Industry bodies: AICE (Memoria 2024/25), ANFAC (parc, registrations, electrified vehicles 2024-25), EPCOL / DGEG (Portugal consumption), Marktest (Portugal networks)
- Companies: Repsol (FY25 results, CMD 2026-28, H1-26 report), Galp (quarterly releases 2024-25, FY25), Moeve (Jan-26 release)
- Statistics: Eurostat (Housing in Europe 2025), PORDATA, FuelsEurope Statistical Report 2026
- Client materials: sample slides pp.14-19 (OC&C, Wood Mackenzie, 1000IQ, Euromonitor data) - used where proprietary benchmarks were already in the client's possession
- Press & surveys: IO Investigación / Plenergy driver surveys, El Español, ECO, Hispanidad, Business People, others as cited
  - Not accessed: OC&C CDDs (Projects Challenger, Olive, Meridian), Project Olive IM (Prax Europe) and paywalled broker research on Galp and Repsol (brief sources 1-4, 7)

Definitions & methodology

- Independent station: no exclusive wholesale supply contract with an operator (CNMC definition); Ballenoil re-classified to Moeve from 2025
- Gross distribution margin (PAI-Ci): pre-tax pump price less the international product quotation (70% MED / 30% NWE); covers logistics, biofuel and stockholding obligations and all wholesale/retail returns
- Volumes: CORES gasolines + automotive diesel, converted to litres at 0.752 / 0.845 kg/l; forecourt share 96% petrol / 77% diesel (CNMC)
- Forecasts (E): either quoted from sources (company targets, 1000IQ market forecast, GANVAM/FACONAUTO) or driven by analyst assumptions held in one place ('Assumptions' tab) and flagged in yellow
- Colour code in Excel: blue = sourced input (cell comment gives source & page), black = formula, green = cross-tab link
- Translations from Spanish and Portuguese source documents by the analyst
